In Lençois Maranhenses, Brazil, De Middel created a phantasmagorical universe symbolizing the Sun and the emotional impact of sunlight.

Amidst sand dunes and expanses of water, drawing on strong lighting, metaphorical shapes and bright colors, she created a theater of life, exuding warmth and abundance.

Through her whimsical, imaginative lens, De Middel creates images that delicately and poetically convey feelings of joy, fulfillment, and freedom. In the presence of her epic tableaux, the viewer feels an overwhelming sense of plenitude and contentment: a lightness of being.
